

Code alpha

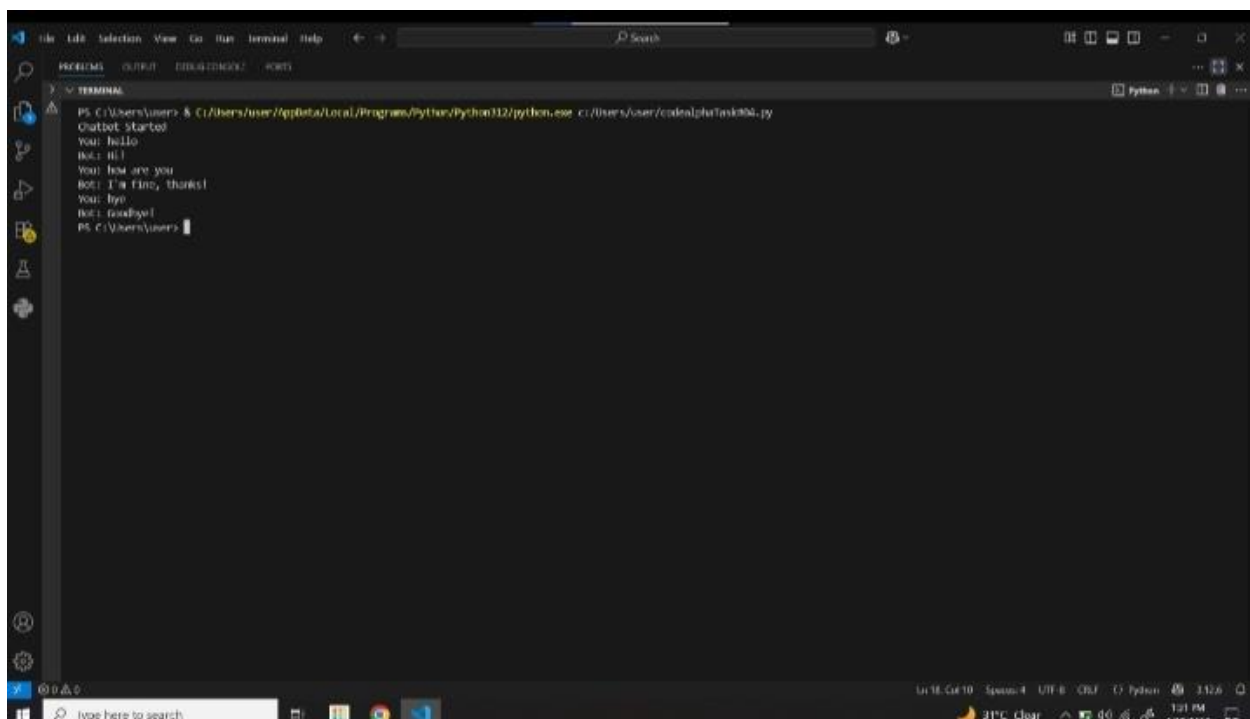

Task#04: Basic chatbot

Code

A screenshot of a code editor window with a dark theme. The editor shows a Python script for a basic chatbot. The script is titled '#Task#04:Basic Chatbot' and includes a function 'chatbot()' that prints 'Chatbot Started' and enters a 'while True' loop. Inside the loop, it takes user input, converts it to lowercase, and uses an 'if-elif-else' structure to respond to 'hello', 'how are you', 'bye', or unknown inputs. The script ends with a call to 'chatbot()'. The editor's interface includes a menu bar, a toolbar, and a sidebar with icons for file explorer, search, and other tools. The status bar at the bottom shows the file encoding as UTF-8 and the Python version as 3.12.6.

```
1 #Task#04:Basic Chatbot
2 def chatbot():
3     print("Chatbot Started")
4
5     while True:
6         msg = input("You: ").lower()
7
8         if msg == "hello":
9             print("Bot: Hi!")
10        elif msg == "how are you":
11            print("Bot: I'm fine, thanks!")
12        elif msg == "bye":
13            print("Bot: Goodbye!")
14            break
15        else:
16            print("Bot: I don't understand")
17
18 chatbot()
```

Output

The image shows a screenshot of a Visual Studio Code (VS Code) terminal window. The terminal is running a Python script located at `c:/Users/user/code/chatbot004.py`. The output of the script shows a chatbot conversation. The prompt bar at the bottom of the terminal shows the current directory is `PS C:\Users\user>`.

```
PS C:\Users\user> & C:/Users/user/AppData/Local/Programs/Python/Python312/python.exe c:/Users/user/code/chatbot004.py
Chatbot Started
You: Hello
Bot: Hi!
You: How are you
Bot: I'm fine, thanks!
You: Bye
Bot: Goodbye!
PS C:\Users\user>
```

The VS Code interface includes a sidebar on the left with icons for Explorer, Search, Run and Debug, and Extensions. The top menu bar shows File, Edit, Selection, View, Go, Run, Terminal, and Help. The status bar at the bottom indicates the file is `chatbot004.py` in the `Python` language, with a file size of 3.12 KB. The system tray at the bottom right shows the date and time as 1:01 PM on 6/20/2024, along with weather information (21°C Clear) and network status (4G).
